

REC ALPHA PURE-RX SERIES

Premium solar panels with
pure power and record strength

REC ALPH α PURE-RX SERIES

Heterojunction technology (HJT)

-0.24% / °C Temp. Coeff.

55 mm hail resistant

>92% power in Year 25

Full-black design

Made in Singapore

BUILT TO LAST

Micro-crack resistant

Standard panels use soldered ribbons that can crack with heat and cold cycles. REC eliminates this entirely as the cell connections in the REC Alpha Pure-RX are solder free.

Cyclone-rating strength

Reinforced with innovative support bars, REC Alpha Pure-RX panels are engineered for superior mechanical strength – handling hail impact, high snow loads, uplift from cyclone-force winds, and the daily thermal stress of the Australian climate.

Resistant to 55 mm hail, an REC record

After being blasted with 55 mm hailstones, REC Alpha Pure-RX panels showed no glass breakage or power failure. The industry baseline is 25 mm. But given today's weather conditions, this basic standard is no longer sufficient. REC takes its robustness and premium quality to new heights.

Beat the heat with REC

While other panels take a power nap in the heat, REC's HJT cells show more endurance and greater yields – especially when the sun shines strongest at midday. That's low temperature coefficient!

A PROTECTED INVESTMENT

Triple 25-year REC ProTrust warranty*

A 25-year warranty for each of Product, Power, and Labor – exclusively from REC Certified Solar Professional installers.

92% minimum power guaranteed in Year 25

This is a contractual promise, not a projection. At only 0.25%, the REC Alpha Pure-RX has the lowest annual degradation rate, ensuring you keep more of your power.

25-year Labor coverage with REC ProTrust

If an REC panel needs to be serviced or replaced, REC will pay a fixed labor fee to an REC Certified Solar Professional installer for approved claims. Most other brands stop at the panel itself!

CERTIFIED
SOLAR
PROFESSIONAL

*REC ProTrust Warranty applies only for (i) REC panels installed by an REC Certified Solar Professional, and (ii) panels have been registered by the installer with REC. Subject to System Size and further conditions.

VALUE-ADDING WARRANTY

Transferrable warranty

The full warranty stays with the property, making homes more attractive at resale and giving future owners the same protection.

Approved for near-coastal installations

REC Alpha Pure-RX is rated for environments that would void the warranty of panels from many other brands.

Auckland, New Zealand
REC TwinPeak 4

Good to know:

The REC ProTrust warranty costs nothing extra – it's your reward for choosing an REC Certified Solar Professional installer.

Ask your installer if they are certified. And if the original commissioning installer goes out of business, REC ProTrust is still valid; REC has you covered!

A TRUSTED BRAND IN SOLAR

European heritage

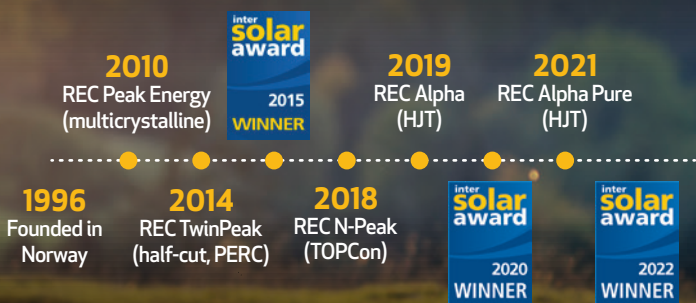

Founded in Norway in 1996, REC is truly a solar pioneer – a leading solar brand with a history and a future!

Made in Singapore

Manufactured with precision and ethics in Singapore, REC panels consistently deliver product quality beyond expectations.

Leading by example

REC has continuously inspired the solar industry with its progressions in panel technology, including mastering HJT – the solar technology of the future, already at REC today.

Multi-award winner

REC has been steadily recognized for quality, innovations, and after-sales service by the solar industry's most credible bodies.
